

Towards Extending Person-Centered Care Theory to Address Care Technology

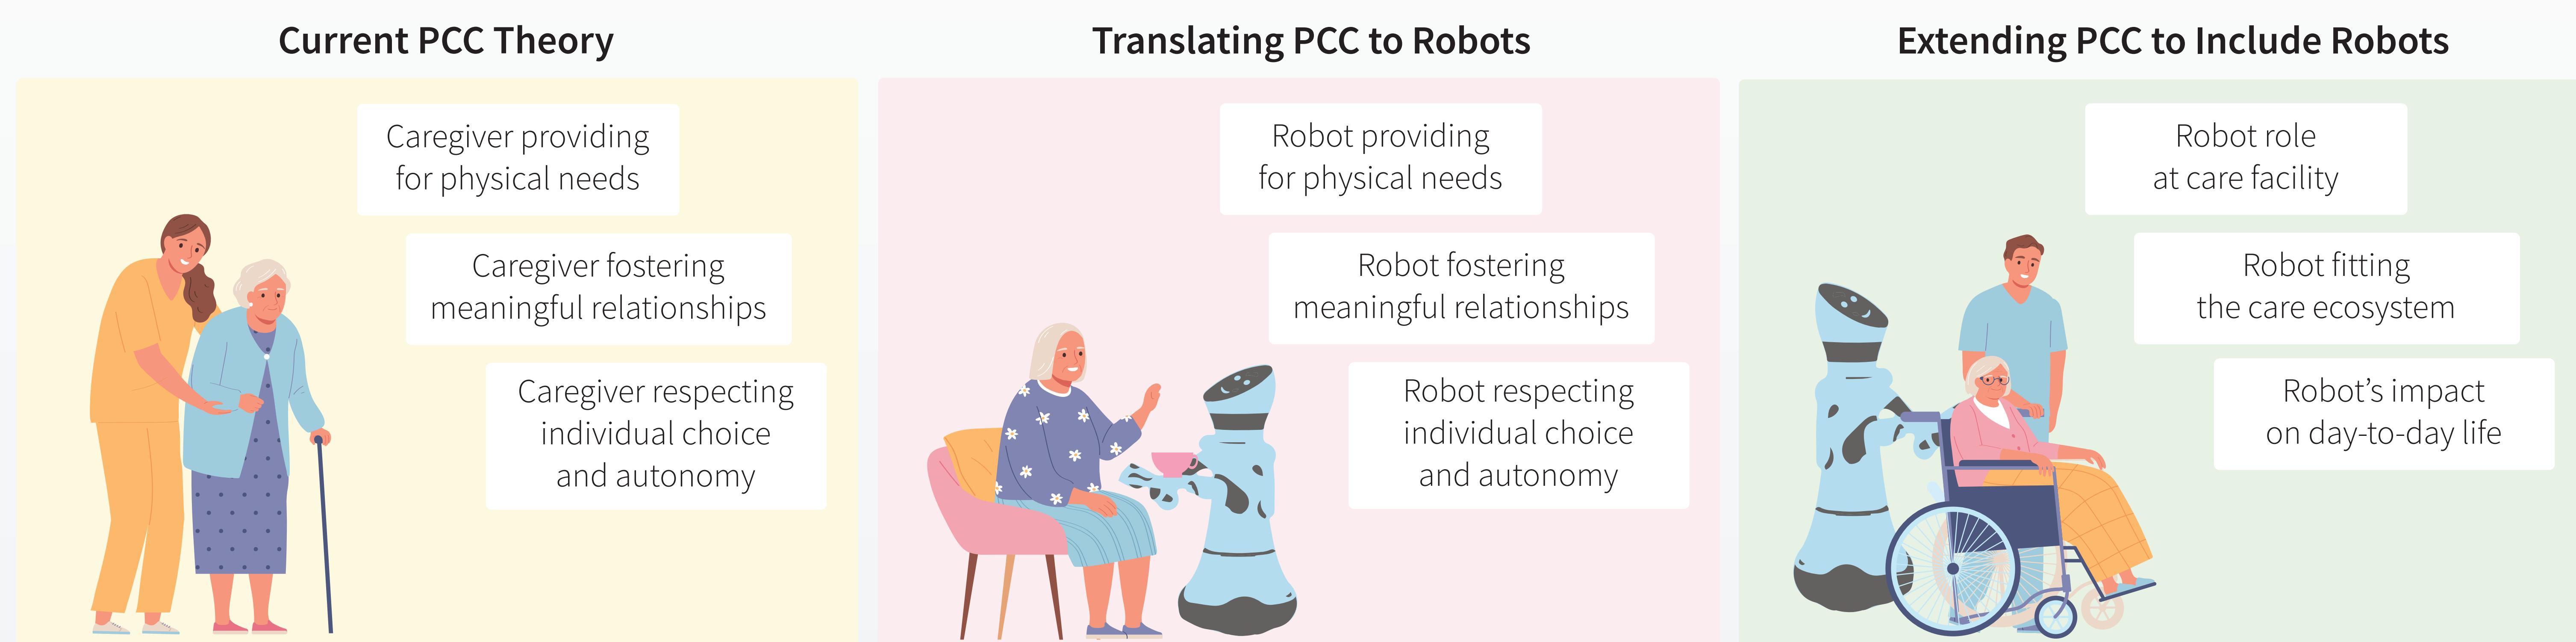

Laura Stegner,¹ Emmanuel Senft,² Tonya Roberts,¹ Bilge Mutlu¹

¹ University of Wisconsin–Madison ² Idiap Research Institute

We suggest that **Person-Centered Care (PCC)** theory should expand to explicitly **incorporate considerations for technology** such as robots or other autonomous agents.

Person-Centered Care Theory for Technology Design

PCC emphasizes care practices should include individual choice and autonomy.

Our Experience: Integrating Robots into Assisted Living

Two prior field studies exploring how a service robot can help caregivers and increase older adults' independence.

Considerations for Technology-Informed PCC
